Northern Union Rugby Football Final Table 1919-20

As in 1914-15, positions in the Northern Union final table of 1919-20 were decided by percentage points gained from points available.

Below are the teams listed in groups – the top six in the table, the teams positioned 7th to 12th, the teams positioned 13th to 18th, and the teams positioned 19th to 25th. Each group is listed in alphabetical order.

1. Estimate the percentage of points gained from points available for each team to the nearest whole number.
2. Use these estimates to write your estimate of each team's final position.
3. Calculate the actual percentage of points gained from points available for each team rounded to two decimal places.
4. Write each team's final position.

N.B. Guide for estimating percentages:

100% = winning every game (i.e. 2 pts per game; e.g. 60 points from 30 games)

75% = averaging 1.5 points per game e.g. 45 points from 30 games

50% = averaging one point per game; e.g. 30 points from 30 games

25% = averaging 0.5 points per game; e.g. 15 points from 30 games

0% = no points
